Platform and Cloud Operations Engineer with enterprise experience in securing, scaling, and optimizing infrastructure across Microsoft, Cisco, and Splunk environments. I build reliable cloud platforms with Kubernetes, Terraform, Go, Python, and a security-first mindset shaped by enterprise cloud support, compliance analysis, and production operations.

CORE STACK

Cloud & Orchestration

AWS Azure OCI GCP
Kubernetes Docker

IaC & CI/CD

Terraform GitHub Actions GitOps
Argo CD Qbec Blue/Green

Security & DevSecOps

Microsoft Defender for Cloud CSPM
CWPP OPSEC Zero Trust

Programming & Observability

Go Python Bash React
PostgreSQL Splunk SPL
Prometheus Firebase

EDUCATION

Ph.D. in Public Administration

Interregional Academy of Personnel Management, 2013

Master of Law

V.I. Vernadsky Taurida National University, 2013

Bachelor of Law

V.I. Vernadsky Taurida National University, 2012

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900).

LANGUAGES

ENTERPRISE EXPERIENCE

Platform Engineering & Cloud Operations - Cisco

Platform engineering, Kubernetes operators | Nov 2024 - Present

- Transitioned to Cisco following the Splunk acquisition, continuing core platform engineering and Kubernetes operator initiatives.
- Extended Cisco/Splunk platform work into Kubernetes operator development, building higher-level abstractions for stateful workloads in Go.
- Focused on PostgreSQL Day-1 and Day-2 lifecycle automation, using AI-augmented workflows for rapid iteration, boilerplate generation, and debugging.

Cloud Operations - Splunk

Infrastructure automation, observability | Dec 2023 - Nov 2024

- Engineered Terraform and Python automation for a large-scale AWS RDS fleet upgrade and Intel-to-Graviton migration, a team initiative that delivered \$500k+ in cost optimization.
- Developed SPL-based observability dashboards and used Splunk Dynamic Templates (Loki) to track infrastructure state and lifecycle events across the fleet.

Microsoft Defender for Cloud Support - LTIMindtree

Cloud security, DevSecOps support | Apr 2023 - Nov 2023

- Provided advanced support for enterprise cloud environments, focusing on Cloud Security Posture Management, workload protection, and complex cloud security incident resolution.
- Troubleshoot security configuration, vulnerability assessment, and operational reliability issues in production environments.
- Translated complex security findings into actionable engineering guidance for customer and internal stakeholders.

Ukrainian: native; English: working proficiency; Polish: B1 conversational.

EARLIER EXPERIENCE

Legal Adviser & Compliance Specialist

Private practice / Medpos Ltd. | 2013 - 2022

- Managed legal analysis, contracts, documentation, and regulatory compliance work, strengthening the audit-oriented mindset now applied to DevSecOps and platform engineering.

SELECTED PROJECTS

Splunk Operator: PostgreSQL Platform Controllers

Go, Kubernetes, Operators, PostgreSQL, CloudNativePG, AI-Augmented Development

Engineered core APIs, including PostgresCluster, PostgresDatabase, and class-based provisioning primitives, to establish a higher-level PostgreSQL platform layer for Splunk on Kubernetes. Added CNPG-backed reconciliation and Day-1/Day-2 lifecycle management for enterprise stateful workloads.

[Repository](#)

Serverless Cloud-Native Web Application

Go, GCP Cloud Run, Docker, Firebase, React

Architected and deployed a multilingual web application with a Go-based REST API and React frontend. Containerized the backend for Google Cloud Run, enabling scale-to-zero delivery, and integrated Firebase for NoSQL-backed state and localization support.
